Quayle Action

1. Claims 4 and 7 are objected to because of the following informalities:

Claim 4, line 3, "sampling" should be replaced by –squaring--; "sampled" should be replaced by –squared--; line 4, "sampled" should be replaced by –squared--; "square" should be replaced by –squared--. So as to be consistent with specification page 3, lines 79-85 and drawing fig. 2. The same comment applies to claim 7.

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 351, recited in the description page 6, line 176. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 201, 291 and 281. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or

amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. This application is in condition for allowance except for the above formal matters.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

5. Claims 1-7 are allowed. However, claims 4 and 7 should be amended to overcome the objection sets forth above.

Reasons for allowance

6. The following is a statement of reasons for the indication of allowable subject matter: a method and apparatus for providing data symbol having first and

second quadrature, and first and second inphase compensated data symbol are disclosed. The closest prior art, Burgin, US Patent No. 6,298,096, discloses similar method and apparatus. However, as noted by applicant in the communications filed on 8/23/04, page 5, lines 2-4, Burgin does not teach or fairly suggest first and second quadrature compensating the same data symbol. Such limitation as recited in the base claims are neither anticipated nor rendered obvious by Burgin.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean B Corrielus whose telephone number is 571-272-3020. The examiner can normally be reached on Maxi-Flex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jay Patel can be reached on 571-272-3086. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
